EDUCATION

Birla Vishvakarma Mahavidyalaya   **2021 - 2025**
*BTech in Information Technology - **CPI – 7.87***   *Anand, Gujarat*

V and C Patel English School   **2021**
*CBSE Board, Science stream - **Percentage - 88***   *Anand, Gujarat*

TECHNICAL SKILLS

Languages: C, C++, JavaScript, Basics of Java, Basics of Python, HTML, CSS, SQL
Other Tools: VS Code, Sublime Text, Git, GitHub
Frontend-Technologies: React, Bootstrap, Tailwind CSS
Backend-Technologies: Node.js, Express.js, Mongo-DB, MySQL, firebase

EXPERIENCE

Tech-Elecon   **06/2023**
Tech – Elecon Pvt. Ltd   *Anand, Gujarat*
- Designed and developed an Employee Management System utilizing ReactJs, MongoDB, Node.js.
- Architected and implemented the user interface (UI) for seamless task assignment. Created efficient APIs to facilitate task management and collaboration using **CRUD operations**.
- Learned about **MERN stack** and working with Apis.

PROJECTS

Dev-Talks - A Web app to share information about different topics on trending technologies
Tech Stack: React, Node.js, Express.js, MongoDB, Firebase   *[View](#)| [GitHub](#)*
- Enabled **user authentication with Google** ensuring secure and streamlined access for users.
- Facilitate engagement by allowing users to create topics, posts, comment on posts, and reply to nested comments, enhancing community interaction, enable notifications.

Rent-a-Life – A system to rent or sell certain products of daily life   *[GitHub](#)*
Tech Stack: React, MongoDB, Express.js, Fire Base
- Developed user authentication for **3 different user roles (renters/sellers, and admins)**, ensuring secure access to relevant functionalities.
- Equipped System admin to seamlessly review the products, users for any malpractices and inappropriate products, taking care of the **inventory**, allowing to download the report in PDF format.
- Users can add the products depending upon the categories and location either on sell/rent or both.
- Implemented a payment gateway using Razor-Pay for secure transaction for the products.

Visitor-Management-system– A system analyzes age, gender, and emotions of customers directly from CCTV or external camera.   *[GitHub](#)*
Tech Stack: React, MongoDB, Express.js, Computer vision, ML
- Developed a visitor recognition system that analyzes age, gender, and emotions of customers directly from CCTV or external camera.
- The system displays real-time analysis on an interactive dashboard.
- Additionally, a website was created to allow users to log in and access the dashboard for detailed insights.

Extra-Curriculars

Code-Chef (Core team member)
- Handled various events and contests as a part of Core team.
- Completed various course on NPTEL on Social Networks, Project Managements and Advanced Computing.
- Solved over 200-300 problems on platforms like Leetcode , GFG , CodeCHef.
